

Atmospheric Chemical Mechanisms Conference

December 7-9, 2022 - U.C. Davis Hybrid Conference

Welcome to the Atmospheric Chemical Mechanisms Conference

You are cordially invited to join us at the Atmospheric Chemical Mechanisms Conference hosted by the University of California, Davis, Air Quality Research Center (AQRC). The AQRC is partnering with the California Air Resources Board to bring you three days of education and discussion in Davis, California.

ACM will bring together research scientists from around the world to discuss the latest advances in atmospheric chemical mechanisms and how these new discoveries can ultimately lead to policies that improve our air quality.

We welcome participation from people engaged in many fields of enquiry in search of a better understanding of how air quality and the communities and governments interact and how to devise better technology to increase our understanding.

We are pleased to have you attend this year's conference and appreciate the effort you must undertake to secure funding and travel visas. Please note that this invitation for participation does not, in any way, financially oblige UC Davis or the ACM Conference for the expenses you incur for travel and conference attendance, and all conference participants are expected to pay the registration fees according with conference policy.

I am certain that by attending ACM you would learn a lot about new approaches and methods and have a unique opportunity to exchange ideas and discuss your work with other colleagues. You can view more information on the conference on our website: acm.aqrc.ucdavis.edu.

Please do not hesitate to contact me if I can be of any assistance in helping you.

Sincerely,

Sandra Hall
